

## Press Release

### IPv6 Council Tunisia Has Been Founded

---

**Tunis/Luxembourg, October 2, 2016** - The IPv6 Forum welcomes the formation of a new IPv6 initiative with the establishment of the IPv6 Council Tunisia under the leadership of Dr. Tarek Bejaoui, as its President. Tarek is associate professor in the Department of Computer Engineering, Faculty of Sciences of Bizerta, and member of the Executive Committee of MEDIATRON Lab. of Sup'Com, University of Carthage. Tarek Bejaoui operates as industrial consultant since 2006, and he is the Founding President of the *Tunisian Wireless Communications Society -TWCS*.

**"The Tunisia IPv6 Council will be winning key stakeholders from government, industry and academia to design the IPv6 roadmap and vision together for Tunisia to embrace the New Internet world based on IPv6,"** stated Dr. Tarek Bejaoui, President, IPv6 Council Tunisia.

The prime objective of the Tunisia IPv6 Council and its members is to promote deployment and coordinated uptake of the new Internet Protocol version 6 (IPv6) with support from industry, education, research communities and government agencies enabling equitable access to technology and knowledge.

**"The Tunisia IPv6 Council has been created to extend to the Tunisian Internet community a strong voice and representation in the new Internet world to create momentum in deploying IPv6,"** stated Latif Ladid, IPv6 Forum President.

The Internet World has been using the Internet Protocol version 4 (IPv4) for the last two decades. Despite its tremendous success, IPv4 is showing signs of strain especially in its fast depleting IP address space and its growing security concerns. IPv6 preserves everything good in today's Internet, and adds much more, such as virtually unlimited IP address space to connect everyone and everything, stateless auto-configuration, seamless mobility, automated network management, end to end security and new optional service levels.

## About the Tunisia IPv6 Council

The Tunisia IPv6 Council is a chapter of the IPv6 Forum dedicated to the advancement and promotion of IPv6 best practices and lessons learned in Tunisia. Comprised of individual members, as opposed to corporate sponsors, its mission is to provide technical leadership and innovative thought for the successful integration of IPv6 into all facets of networking and telecommunications infrastructure, present and future.

## About IPv6 Forum

The IPv6 Forum is a world-wide consortium of international Internet service providers (ISPs) and National Research & Education Networks (NRENs), with a mission to promote IPv6 by improving market and user awareness, creating a quality and secure New Generation Internet and allowing world-wide equitable access to knowledge and technology. The key focus of the IPv6 Forum today is to provide technical guidance for the deployment of IPv6. IPv6 Summits are organized by the IPv6 Forum and staged in various locations around the world to provide industry and market with the best available information on this rapidly advancing technology.
